

Innovative solutions for extraordinary success!

June 22, 2012

Bob and Diane, with Miracle Limbs Network are an amazing provider for amputees; a resource center, peer support, mentor – advisor, in short a Gatekeeper.

When a person faces the life altering trauma of an amputation, they find themselves with complete unknowns. We have witnesses how much Miracle Limb Network unconditionally helps advise, support, and coordinate the individual and total family care.

It has been an honor to have Miracle Limb Network become a regional supporter in the Kentuckiana area. They empower amputees to find the most appropriate prosthetic care and treatment for their life altering event. Bob and Diana are truly an amazing resource for amputees. They are the gatekeepers (some who helps with a variety of issues an amputee and their family will faces) and who help coordinate their recovery.

Innovative solutions for extraordinary success!

June 4, 2012

Miracle Limbs-Courage in Motion is an amazing entity to work with. As a provider for prosthetics, it has been discouraging to see many people flounder to find the resources and help that they need when faced with amputation. The need of a resource coordinator and support person is greatly limited in our area. Miracle Limbs, has reached out to the Louisville Area to become the newest resource for the increasing prosthetic population.

When a person faces amputation, they not only find themselves in an entirely new realm of existence; but their entire family and personal identity can come into question. The resources to find the most appropriate prosthetic care is only a small portion of the persons needs.

Miracle Limb not only helps a new amputee interview and coordinate prosthetic care, they also help coordinate the needs of the family. Miracle Limbs-Courage in Motion has recently began to support our local prosthetic community. With their beginnings we have seen stronger prosthetic users who not only are more confident in their new prosthetic life but also seem to have strong family support because the new amputee is supported as a whole.

It has been an honor to work with Bob and Diana from Miracle Limbs-Courage in Motion! They truly are an amazing resource for amputees and have become the gate keepers to help coordinate the recovery of the individual, the family, and community when someone is faced with the life altering world of prosthetics.
